Art Unit: 3672

DETAILED ACTION

Page 2

Specification

The disclosure is objected to because of the following informalities:

On page 1 of the specification the title of the invention should not appear in brackets and the recitation "Description" should be deleted.

The abstract of the disclosure is objected to because the title of the invention should not appear on the abstract page.

Corrections are required. See MPEP § 608.01(b).

Claim Objections

Claims 31-36 are objected to because of the following informalities:

The recitation "pressure sensor" in claim 31, line 11 lacks antecedent basis.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3672

Claims 31-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Chalitsios et al., U.S. 6,856,255.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another." or by an appropriate showing under 37 CFR 1.131.

Regarding claims 31-35, as best understood by the examiner, Chalitsios et al. discloses all the claimed limitations including a retrievable while drilling tool (300) within a collar sensor section (130) of the drilling tool generally shown in figure 1 also having a mud passage (9) therein. Chalitsios et al. discloses a radiation detector (328) in the collar sending signals to the control (306) in the while drilling tool and telemetry (308) for uphole communication.

Allowable Subject Matter

Claims 1-30 are allowed.

Claim 36 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record does not disclose or suggest all the claimed subject matter including the sensor exposed to wellbore pressure.

Application/Control Number: 10/708,893 Page 4

Art Unit: 3672

The prior art of record does not disclose or suggest all the claimed subject matter including the sensor positioned within the pocket of the sidewall

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Thompson whose telephone number is 571 272-7037. The examiner can normally be reached on 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-

217-9197 (toll-free).
